“The Best Part About Gen AI? You Don't Need A Tech Background!”

- SAMANTHA RUTH PRABHU
Indian Actor
Vocal advocate for women's empowerment & wellness
SAWIT Advisor

Why Join?

Upskilling worth INR 5,000 - FREE

Incredible value: boost your skills with training valued at INR 5000, absolutely free.

Land your dream tech job

Stand out from the crowd with practical Gen AI Skills and a **branded certificate from our Tech Partner.**

Don't miss the 3rd Tech Revolution

Get in at ground zero and learn the key AI skills you need to win in today's job market.

Continued learning with Google Cloud Innovator

Grow your in-demand AI skills with Google Cloud Innovator's learning opportunities and get \$35 in learning credits each month.

Hackathon prize INR 75,000

Attend the Learnathon and you'll have all the knowledge you need to enter the Hackathon for a shot at winning INR 75,000!

Grow your career in any field

Whether you're studying tech, business, art or healthcare, AI knowledge can set you apart.

No Tech Background? No Problem!

It Doesn't Matter How Much Tech Knowledge You Have - SAWIT.AI Is Designed So That Anyone Can Understand The Content. Plus, We'll Give You These Pre-Event Learning Materials So You Feel Totally Prepared To Enjoy

The Course:

- GUVI's Zero To Hero Python Course (Optional)
- GUVI's Gen AI Frameworks Course

Women-Led, Women-Focused

Be part of a supportive, women-only learning environment designed to help you thrive. Accelerate your career with access to the exclusive SAWIT Networking

Community, where you can:

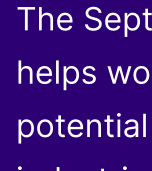

- Network with like-minded professionals
- Connect with mentors and mentees
- Explore upskilling opportunities

What you'll learn

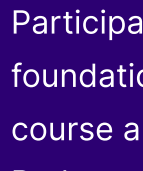

Whether you're just starting out, or want to deepen your skills, SAWIT.AI will help you master the Gen AI technology that can enhance your future career in any field—**for free.**

KEY OUTCOMES:

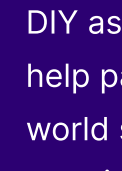

Demystifying AI

The September 21 Learnathon helps women explore AI's potential and impact across industries, breaking down barriers with women-led videos and practical use cases.

Simplifying AI

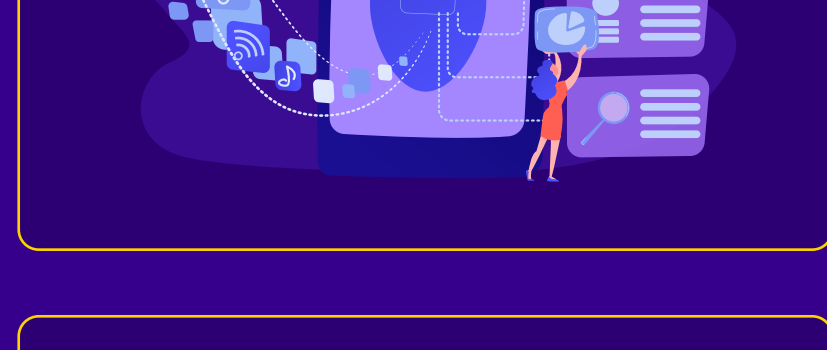

Participants build a strong AI foundation with a 4-hour Gen AI course and an optional 11-hour Python course, all designed to be digestible and confidence-boosting.

Applying AI

DIY assessments and challenges help participants apply AI in real-world scenarios, fostering creativity and innovation in roles like customer service, risk, and sales.

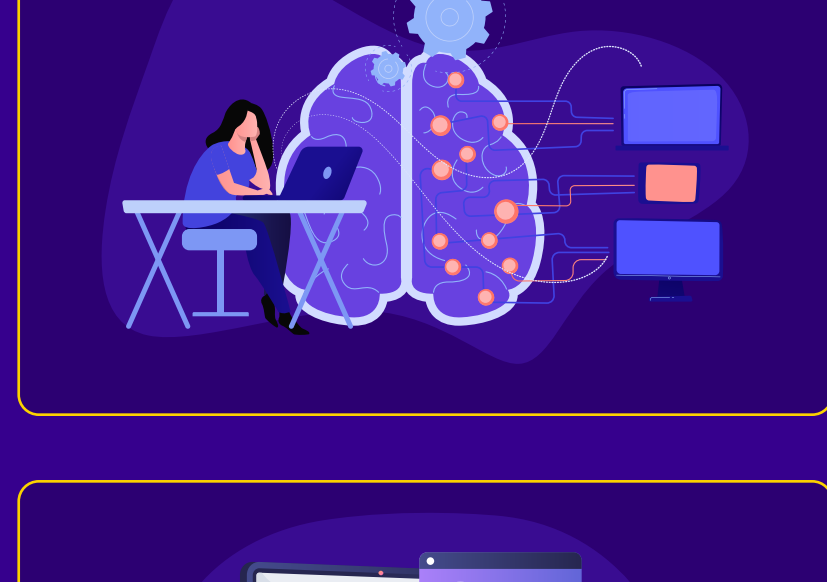

LEARNING MODULES:

MODULE 1

Basics Of Machine Learning

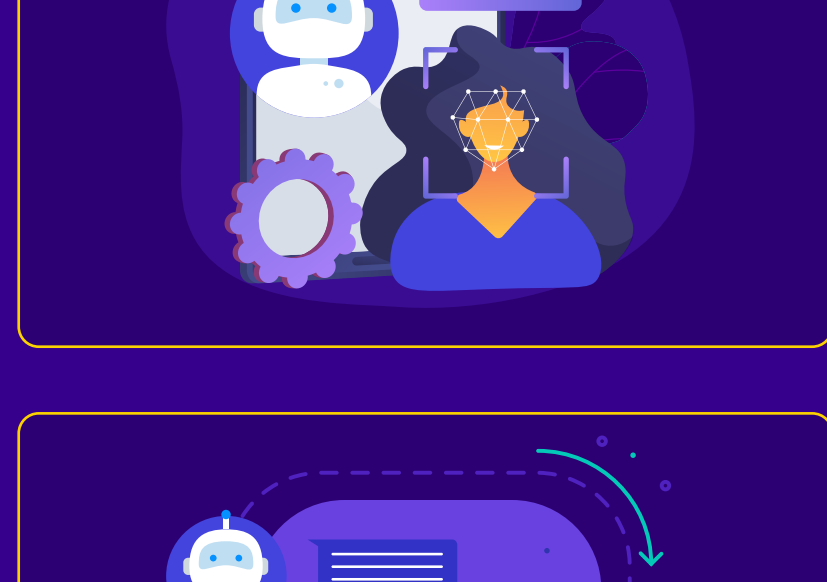

Discover how machines can learn from data and make decisions on their own. This introduction will give you a foundation in how computers are trained to recognize patterns and solve problems.

MODULE 2

Basics Of Deep Learning

Learn about a powerful type of machine learning that mimics how the human brain works. You'll explore how computers can use layers of learning to understand complex tasks like image and speech recognition.

MODULE 3

How To Build An Image Recognition Model

Find out how to teach a computer to recognize and identify objects in pictures. You'll learn the steps to create your own image recognition model.

MODULE 4

How To Build A RAG Application

Explore how to build an application that can answer questions by retrieving and generating key information from large amounts of data. This hands-on guide will show you how it works in real-life applications like chatbots and virtual assistants.
